

Reversible Table Runner

Cut from 2 complimenting fabrics 10" to 12" wide x desired length. Short lengths will make coordinating placements.

Place fabrics right sides together and stitch long sides with a 1/2 " seam leaving an opening for turning. Press seams open.

With fabrics still wrong side out. shift the fabrics so that the seams run down the center of the tube instead of the sides. Stitch across each end.

Turn right sides out thru the opening and stitch the opening closed.

Tuck the point into itself depending on which side of the table runner you want up!
