Santa

This kit makes 2 complete Santas!

Refer to the general directions for constructing the Log Cabin blocks.

Below are specifics for this project.

1st round = white
2nd round = red
3rd round = green
4th round = red
5th " = "
6th " = "

Cutting directions:

Pink face fabric= center square-Cut (1) 2 1/2" square

All strips are cut at correct size for you - all 1". There also is a 1 1/2" white strip. Save that for the hat trim.

Sew block according to picture. **Note:** Each color goes all the way around the block.

When finished sewing the log cabin block, measure it to determine your personal measurement, then cut 1 red square that size. Cut the red square in half from corner to corner which means you are cutting it in half diagonally - now you have 2 triangles for Santa's hat. Cut 1" off the long side each red triangle and discard. Sew the 1 1/2" strip of white to this edge. This is the trim for the hat. Save plenty of room when you place the white strip on the red triangle because you will sew, press and then trim the extra white off at the ends.

Now, cut your log cabin block in half. See below. Make sure you look at the center square when lining up to cut the block in half.

Sew triangle hats to each half of the log cabin.

Make 2 eyes with a fine permanent marker or Pigma pen.

Measure your Santa block. Cut two backings this size from the red fabric. Layer with backing, batting and top. Sew around edge leaving opening for turning, then hand sew closed. Voila - 2 Santa's!

Put around a wine bottle by sewing ends together. Use as a pot holder - if so---add insulbrite with the batting. Use as a mug rug. Give as a gift. Think of more uses!
